TOROMONT

CATERPILLAR®

These are some of the e-learning courses available on Caterpillar University.

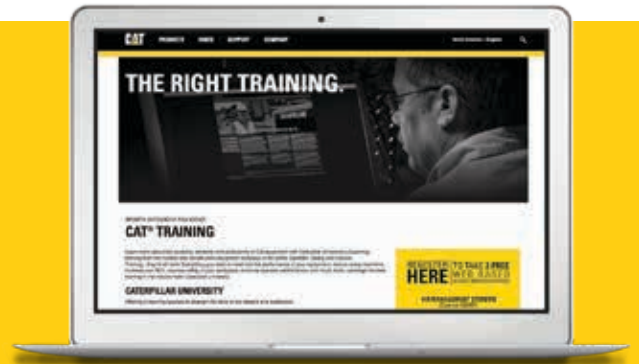

Service is an integral part of owning any machine or engine, ensuring increased up-time while reducing costs. Caterpillar offers **over 100** *courses to help you keep your equipment running at maximum capacity, like:

- Basic Air Conditioning
- Brake Fundamentals
- Electrical Fundamentals
- Hydraulic Service
- Preventive Maintenance

*Most Service courses available in Spanish, Chinese and French.

Operator training courses provide the knowledge to move the maximum amount of material in the minimum amount of time. Caterpillar offers **18** courses which focus on delivering learning and tools to address the basics of operating Cat machines, such as:

- Track-Type Tractors - Quarry/Mining (D9T-D11R)
- Backhoe Loaders - Gen. Construction (416E - 450E)
- Wheel Loaders - Heavy Construction (928F - 980H)
- Hydraulic Excavators - Quarry/Mining (365B - 5230B)
- Articulated Trucks - Heavy Construction (725 - 740)
- Off-Highway Trucks - Quarry/Mining (777B - 797B)
- Motor Graders - Quarry/Mining (14M - 24M)

Strategies for Safety Managers

begins with values, such as safety knowledge, respect for each individual, teamwork, performance, communication and integrity. The Strategies for Safety Managers offers **3 sets** of courses:

- Strategies for Safety Managers
- Effective Communication
- Near Miss Reporting

Safety is of the utmost importance, which is why Caterpillar offers **over 125** new safety training *courses. These courses use 3D graphics to demonstrate best practices as you strive toward "Zero-Injuries." Some of the courses include:

- Operator Visibility for Heavy Equipment
- Escape Respirator and SCSRs MSHA
- Forklift Training
- Hazard Communication 2012 - GHS
- Trenching and Excavating Safety

*Some Safety courses available in Spanish, Chinese and German.

NOT JUST ANY TRAINING. THE RIGHT TRAINING.
